Humana. Claims Payment Policy

Subject: Laboratory – Diagnosis of Vaginitis

Application: Medicare Advantage Products
Policy number: LAB2023030
Published date: 06/2023
Revision date: 12/2025

Disclaimer*: The intended audience of this medical claims payment policy is healthcare providers who treat Humana members. This policy is made available to provide information on certain Humana claims payment policies. This policy is a guideline only and does not constitute medical advice, guarantee of payment, plan pre-authorization, an explanation of benefits, or a contract. This policy does not govern whether a procedure is covered under a specific member plan or policy, nor is it intended to address every claim situation. Claims may be affected by other factors, such as: state and federal laws and regulations, provider contract terms, and our professional judgment. This policy is subject to change or termination by Humana. Humana has full and final discretionary authority for its interpretation and application. No part of this policy may be reproduced, stored in a retrieval system or transmitted, in any shape or form or by any means, electronic, mechanical, photocopying or otherwise without express written permission from Humana. When printed, this version becomes uncontrolled. For the most current information, always refer to the following website:* ***Humana.com/ClaimPaymentPolicies***

Medicare Advantage Payment Policy

As a Medicare Advantage plan, we have developed payment policies to explain coverage more fully for services. The criteria outlined will apply to Medicare Advantage plans except when the procedure(s) has established criteria through the Original Medicare National Coverage Determinations (NCDs) and Local Coverage Determinations (LCDs) as outlined below.

In addition to this policy, claims payments are subject to other plan requirements for the processing and payment of claims, including, but not limited to, requirements of medical necessity and reasonableness and applicable referral or authorization requirements.

- The following tests **ARE REIMBURSABLE** for any of these conditions: bleeding, inflammation, itching, pain, pelvic infection, pregnancy with history of pre-term labor, redness and vaginitis:
  - Aptima® BV Assay (CPT code 81513**)
  - BD MAX™ Vaginal Panel (CPT code 81514**)
  - Direct probe deoxyribonucleic acid (DNA) based identification of *Gardnerella* (CPT code 87510*), *Trichomonas* (CPT code 87660*) and *Candida* (CPT code 87480*)
  - Nucleic acid amplification testing (NAAT) or polymerase chain reaction (PCR) based identification of *Gardnerella vaginalis* (CPT code 87511*, CPT code 87512*)
  - NAAT or PCR based identification (CPT code 87661*) of *Trichomonas vaginalis*
  - PCR based identification of *Candida* (CPT code 87481*, CPT code 87482*)
  - Testing for the presence of amines (CPT code 82120)
  - Xpert® Xpress Mutliplex Vaginal Panel (MVP) (CPT code 81515***)

- Screening for *Trichomonas* (CPT code 87660*, CPT code 87661*) **IS REIMBURSABLE** for any of the following risk factors:
  - Exchange of sex for payment
  - History of sexually transmitted infections (STIs)
  - Human immunodeficiency virus (HIV)
  - Incarceration
  - Injection drug use
  - New or multiple partners

- For asymptomatic individuals, including asymptomatic pregnant individuals at an average or high risk for premature labor, screening for trichomoniasis or bacterial vaginosis (CPT code 87480*, CPT code 87510*, CPT code 87661*) **IS NOT REIMBURSABLE**.

- Rapid identification of *Trichomonas* by enzyme immunoassay (CPT code 87808) **IS NOT REIMBURSABLE**.

Applicable procedures for Medicare Advantage plans

Procedure Code	Code Description
81513**	Infectious disease, bacterial vaginosis, quantitative real-time amplification of RNA markers for Atopobium vaginae, *Gardnerella vaginalis*, and Lactobacillus species, utilizing vaginal-fluid specimens, algorithm reported as a positive or negative result for bacterial vaginosis Proprietary test: Aptima® BV Assay Lab/Manufacturer: Hologic, Inc
81514**	Infectious disease, bacterial vaginosis and vaginitis, quantitative real-time amplification of DNA markers for *Gardnerella vaginalis*, Atopobium vaginae, Megasphaera type 1, Bacterial Vaginosis Associated Bacteria-2 (BVAB-2), and Lactobacillus species (L. crispatus and L. jensenii), utilizing vaginal-fluid specimens, algorithm reported as a positive or negative for high likelihood of bacterial vaginosis, includes separate detection of *Trichomonas vaginalis* and/or *Candida* species (C. albicans, C. tropicalis, C. parapsilosis, C. dubliniensis), *Candida* glabrata, *Candida* krusei, when reported Proprietary test: BD MAX™ Vaginal Panel Lab/Manufacturer: Becton Dickson and Company
81515***	Infectious disease, bacterial vaginosis and vaginitis, real-time PCR amplification of DNA markers for Atopobium vaginae, Atopobium species, Megasphaera type 1, and Bacterial Vaginosis Associated Bacteria-2 (BVAB-2), utilizing vaginal-fluid specimens, algorithm reported as positive or negative for high likelihood of bacterial vaginosis, includes separate detection of *Trichomonas* vaginalis and *Candida* species (C. albicans, C. tropicalis, C. parapsilosis, C. dubliniensis), *Candida* glabrata/*Candida* krusei, when reported Proprietary Test: Xpert® Xpress Multiplex Vaginal Panel (MVP) Lab/Manufacturer: Cepheid
82120	Amines, vaginal fluid, qualitative
87480*	Infectious agent detection by nucleic acid (DNA or RNA); *Candida* species, direct probe technique
87481*	Infectious agent detection by nucleic acid (DNA or RNA); *Candida* species, amplified probe technique
87482*	Infectious agent detection by nucleic acid (DNA or RNA); *Candida* species, quantification technique
87510*	Infectious agent detection by nucleic acid (DNA or RNA); *Gardnerella vaginalis*, direct probe technique
87511*	Infectious agent detection by nucleic acid (DNA or RNA); *Gardnerella vaginalis*, amplified probe technique
87512*	Infectious agent detection by nucleic acid (DNA or RNA); *Gardnerella vaginalis*, quantification
87660*	Infectious agent detection by nucleic acid (DNA or RNA); *Trichomonas vaginalis*, direct probe technique
87661*	Infectious agent detection by nucleic acid (DNA or RNA); *Trichomonas vaginalis*, amplified probe technique
87808	Infectious agent antigen detection by immunoassay with direct optical observation; *Trichomonas vaginalis*
