Humana. **Claims Payment Policy**

Subject: Laboratory – Immune Cell Function Assay

Application: Medicare Advantage Products
Policy number: LAB2023011
Published date: 04/2023
Revision date: 05/2026

Disclaimer: *The intended audience of this medical claims payment policy is healthcare providers who treat Humana members. This policy is made available to provide information on certain Humana claims payment policies. This policy is a guideline only and does not constitute medical advice, guarantee of payment, plan pre-authorization, an explanation of benefits, or a contract. This policy does not govern whether a procedure is covered under a specific member plan or policy, nor is it intended to address every claim situation. Claims may be affected by other factors, such as: state and federal laws and regulations, provider contract terms, and our professional judgment. This policy is subject to change or termination by Humana. Humana has full and final discretionary authority for its interpretation and application. No part of this policy may be reproduced, stored in a retrieval system or transmitted, in any shape or form or by any means, electronic, mechanical, photocopying or otherwise without express written permission from Humana. When printed, this version becomes uncontrolled. For the most current information, always refer to the following website:* ***Humana.com/ClaimPaymentPolicies***

Medicare Advantage Payment Policy

As a Medicare Advantage plan, we have developed payment policies to explain coverage more fully for services. The criteria outlined will apply to Medicare Advantage plans except when the procedure(s) has established criteria through the Original Medicare National Coverage Determinations (NCDs) and Local Coverage Determinations (LCDs) as outlined below.

In addition to the policy, claims payments are subject to other plan requirements for the processing and payment of claims, including, but not limited to, requirements of medical necessity and reasonableness and applicable referral or authorization requirements.

- An immune cell function assay (CPT code 81560, CPT code 86352*, CPT code 0018M) **IS NOT REIMBURSABLE**.

Applicable procedures for Medicare Advantage plans

Procedure code	Code description
81560	Transplantation medicine (allograft rejection, pediatric liver and small bowel), measurement of donor and third-party-induced CD154+T-cytotoxic memory cells, utilizing whole peripheral blood, algorithm reported as a rejection risk score Proprietary test: Pleximmune™ Lab/Manufacturer: Plexision, Inc
86352*	Cellular function assay involving stimulation (e.g., mitogen or antigen) and detection of biomarker (eg, ATP)
0018M	Transplantation medicine (allograft rejection, renal), measurement of donor and third-party-induced CD154+T-cytotoxic memory cells, utilizing whole peripheral blood, algorithm reported as a rejection risk score Proprietary test: Pleximark Lab/Manufacturer: Plexision, Inc

**The payment criterion for 86352 applies to all Medicare jurisdictions, except states awarded to Novitas Solutions, Inc.*

Original Medicare Local Coverage Determinations (LCDs)

Contractor name	Policy title	Policy number	Procedure code
Novitas Solutions, Inc.	Assays for Vitamins and Metabolic Function	L34914	86352
